## Skilled Nursing

### Short-term Services

For those seeking short-term medical and/or rehabilitative services, we focus our efforts on working closely with the patient and family and strive to achieve the most successful functional outcomes. Supporting the nursing team is a group of licensed therapists who provide physical, occupational and speech therapies for patients recovering from major surgery, stroke, neurological and orthopedic conditions and other illnesses, injuries and disabilities. This dedicated team of healthcare professionals works together to design individualized care plans tailored to each patient's specific needs.

We are guided by the principle that the best results are achieved when we work together.

### Long-term Care Services

Our long-term care services are designed for individuals who need 24-hour nursing care. These residents may be chronically ill, frail or experiencing a very slow recovery from an illness or injury. Our long-term care units offer private and semi-private room accommodations including room furnishings, multiple common areas and dining lounges. In addition, we offer respite or vacation care that allows families an opportunity to take a brief break from the demands of caring for a loved one around-the-clock.

We accept Medicare, Medicaid, managed care insurance and private pay.
